NC InCK NC INTEGRATED CARE FOR KIDS

GUIDE TO DATA COLLECTION AND SUBMISSION

This project includes regular data collection and submission cycles, which will be facilitated via a baseline, (July), endline, (March), and recurring monthly, (July - March), survey. Each survey will take 10 - 20 minutes to complete. Practice information may be shared in aggregate form, but no individual practices or names will be reported.

Baseline and Endline Surveys

After attending the first Learning Collaborative, (July 7, 2023), and the last Learning Collaborative, (December 1, 2023), the Kindergarten Readiness Champion will be asked to complete a baseline and endline survey, respectively. These surveys will help us understand the opportunities and challenges associated with promoting kindergarten readiness.

For data submission, please have the following information available for your practice:

- Total number of pediatricians, family physicians, nurse practitioners, and physician assistants in your practice
- Total number of social workers, care managers, and care coordinators in your practice
- Number of health care workers that plan to or have participated in the learning collaborative
- Influenza immunization rate (ages 6 months – 18 years) for calendar year 2022, (captured at baseline), and 2023, (captured at endline), (This is to ensure that other aspects of care quality are maintained)
- Number of patient visits annually, (captured at baseline)
- Patient demographics by race, (captured at baseline)

Monthly Survey

At monthly increments, the champion from each practice will be asked to submit monthly data submissions via this survey link. Submissions are requested by the 15th day of the month, beginning July 2023 and ending March 2024. In return, NC InCK will build run charts (updated and shared with practices monthly), to inform QI efforts.

For monthly data submissions, please have the following information available for your practice:

- Number of well visits for children ages 0 – 5 (until 6th birthday) in the past month
- Number of kindergarten readiness promotion codes (1003F) used in the past month
- Number of developmental screening codes (96110) for children ages 0-5 (until 6th birthday) in the past month
- Number of social-emotional screening codes (96127) for children ages 0-5 (until 6th birthday) in the past month
- Number of fluoride varnish codes (D1206 and 99188) for children ages 0-5 (until 6th birthday) in the past month
- Number of Reach Out and Read books given to children ages 0-5 (until 6th birthday) in the past month

Practices will also be asked to describe the PDSA cycles initiated by your practice over the past month. If there are barriers to obtaining the above information, please reach out to our project team for support.
